1. If a person walked at 12 km/ h instead of $8\frac{1}{2}$ km/h, he would have walked 14 km more. The actual distance travelled by him was?
2. Two persons starts from two different places Hyderabad and Vijayawada towards each other at speeds 35 km/hr and 40 km/hr respectively. At the time of meeting, the first person travelled a distance of 56 kms then find the distance travelled by 2nd person?
3. A thief was spotted by a policeman from a distance of 225 metres. When the policeman started the chase, the thief also started running. If the speed of the thief was 11 km/h and that of the policeman was 13 km/h, how far would the thief have run, before the policeman caught up with him?
4. A constable follows a thief who is 200 mts ahead of the constable. If the constable and thief have run at 8 kmph and 7 kmph respectively. The constable would catch the thief in how many minutes?
5. 2 cars X and Y start running towards each other from 2 places 216 km apart. The ratio of the speeds of X and Y is 5:7 and speed of the X is 60 kmph. After how many minutes will X and Y meet each other?
6. Distance between Hyderabad and Vizag is 660km. From Hyderabad, two persons start their journey with 70 kmph and 98 kmph respectively at same time. When faster person reached Vizag and return and meet slower person at Rajahmundry on the way. Find the distance between Vizag and Rajahmundry?
7. Two trains A and B start with uniform speeds at the same time from points P and Q, respectively, toward each other. After crossing each other, A takes 16 hours to reach Q and B takes 4 hours to reach P. If train A is moving with a speed of 54 km/h, the speed of B (in km/h) is:
8. Two trains, A and B, start from station X and Y towards Y and X respectively. After passing each other, they take 4 hours 48 minutes and 3 hours 20 minutes to reach Y and X respectively. It what time they meet each other?

PRACTICE QUESTIONS:

1. A thief is spotted by a policeman from a distance of 200 m. When the policeman starts chasing, the thief also starts running. If the speed of the thief be 16 km/h and that of the policeman be 20 km/h, how far the thief will have run before he is overtaken?
2. If a person walks at 9kmph instead of 4 Kmph, he covers 7.5 km more. How much distance did he actually cover?
3. Two persons move from Hyderabad to Vijayawada at the same time with speeds of 40 km/h and 60 km/h. The faster person reaches Vijayawada and returns towards Hyderabad, meeting the slower person at Kodada. If the distance between Hyderabad and Vijayawada is 250 km, find the distance between Kodada and Vijayawada?
