1. The speeds of two persons A and B in the ratio of 2 : 3. The ratio of the time taken by these two persons for travelling the same distance is
2. The speeds of three cars are in the ratio of 2 : 3 : 5 find the ratio of the time taken by the above cars to travel the same distance?
3. The ratio of the speeds of A and B is 2 : 5. To cover a certain distance, if A takes 15 minutes more than B, then how much time (in minutes) will B take to cover the same distance?
4. A is twice as fast run as B, and B is thrice as fast run as C. If C travelled a distance in 1 hour 54 minutes, the time taken by B to cover the same distance is
5. Walking at 3/5 of his usual speed, a man covers a certain distance in one hour and 40 minutes more than the time he takes to cover the distance at his usual speed. The time taken by him to cover the same distance at his usual speed is:
6. A person reaches his destination 32 minutes late if his speed is 6 km/h, and he reaches 18 minutes before time if his speed is 7 km/h. Find the distance of his destination from his starting point.
7. If a Bus runs at a speed of 40 kmph reaches its destination late by 11 minutes but if it runs at a speed of 50 kmph it is late by 5 minutes only. Then the distance travelled by the bus, in kms?
8. With a speed of 42 km/h, a truck reaches its destination in time. If it moves with a speed of 14 km/h, it is late by 35 minutes. The length of the journey is:
9. If a Bus runs with the speed of 72 km/h, it reaches its destination late by 15 minutes. However, if its speed is 90 km/h, it is late by only 5 minutes. The correct time to cover its journey in mints?
10. Excluding stoppages, the speed of a bus is 60 km/h and including stoppages, it is 51 km/h. For how many minutes does the bus stop per hour?

PRACTICE QUESTIONS:

11. A man takes 12 minutes to cover a certain distance at a speed of 8 km/h. If he walks at a speed of 12 km/h, how long will he take to cover the same distance?
12. An aeroplane covers a certain distance at a speed of 320 km/h in $5\frac{1}{2}$hrs. To cover the same distance in 4 hours, it must travel at a speed of:
13. The speeds of three cars are in the ratio of 3:4:8. The ratio of the time taken by these cars for travelling the same Distance?
14. A bus running at $\frac{7}{11}$ of its own speed reached a place in 22 hours. How much time could be saved if the bus would run at its own speed?
15. A train without stoppage travels with an average speed of 70km/h and with stoppage, it travels with the average speed of 56km/h. How many minutes, does the train stop in two hours?
