TIME AND WORK -1

1. A can do a work in 10 days and B can do the same work in 15 days. In how many days, the work would be completed if they work together?
2. A can do a work in 6 days and B in 9 days. How many days will both take together to complete the work?
3. A and B can complete a work in 12 days. B can complete the same work alone in 24 days. Find the time taken by A to complete the whole work alone?
4. A, B and C can respectively complete a work in 10, 12 and 15 days. Find the time taken by all of them to complete if they work together?
5. A and B together can complete a work in 12 days, B and C together in 15 days and C and A together in 20 days. If they all work together, in how many days can they complete the work?
6. A and B can do a piece of work in 10 days, B and C can do it in 12 days and C and A can do it in 15 days. Then the number of days required for A to complete this work is?
7. A can do $\frac{1}{4}$ work in 10 days, B can do 40% of work in 40 days and C can do $\frac{1}{3}$ of work in 13 days. Who will complete the work first?
8. A can do $\frac{1}{3}$ of a job in 3 days and B can do $\frac{1}{2}$ of the job in 9 days. If they work on it together, then in how many days can they finish half of the job?
9. A can complete 25% of a work in 15 days and then B alone finishes the remaining work in 30 days. In how many days will A and B working together finish 50% of the same work?
10. In a doing work A take 9 days more than A and B together takes, B takes 4 days more than A and B together takes. Find the time taken by A and B together takes?

PRACTICE QUESTIONS:

1. A can do a piece of work in $13\frac{1}{3}$ days and B can do the same piece of work in $6\frac{2}{3}$ days. Find in how many days both can do the work?
2. A and B can do a piece of work in 10 days, B and C can do it in 12 days and C and A can do it in 15 days. Then the number of days required for A to complete this work is?
3. In a doing work A take 18 days more than A and B together takes, B takes 8 days more than A and B together takes. Find the time taken by A alone and B alone?
4. A can complete one-sixth of a work in 5days and B can complete one-fourth of the same work in 15days. In how many days, will both working together complete the work?
