1. A and B can do a piece of work alone in 12 days and 16 days respectively. They worked together for 4 days and B left the work. In how many days total work would complete?
2. A and B can do a piece of work in 20 days and 12 days respectively. A started the work alone then after 4 days B joined him till the completion of the work. How many days the work would be completed?
3. A and B can do a work in 45 and 40 days respectively. They began the work together, but A left it after some time and B finished the remaining work in 23 days. Then the number of days that A worked with B, is?
4. A work can be completed by A, B and C alone in 12, 8 and 6 hours respectively. All the three worked for two hours and C left the work. The time (in minutes) taken by the other two to complete the remaining work is:
5. A, B, C can do a work in 12, 15, 20 days respectively. A, B, C started working after 3 days A left the work, after 2 more day C also left in how many days total work will completed?
6. A, B and C can do a piece of work in 46 days, 92 days and 23 days, respectively. A started the work. B joined him after 2 days. If C joined them after 8 days from the beginning, then for how many days did A work?
7. A alone can do a work in 3 days and B alone can do the same work in 6 days. If they work on alternate days in how many days the work would be completed?
8. A and B can do a work in 12 days and 36 days respectively. If they work on alternate days in how many days the work would be completed. (The work begin with A)
9. A and B can do a work in 25 days and 15 days respectively. If they work on alternate days in how many days the work would be completed.
   i)The work begin with A ii) The work begin with B
10. A, B and C can do a piece of work in 30, 20 and 10 days respectively. A is assisted by B on one day and C on the next day alternately. How long would the work take to finish?
11. 8 men or 12 women can do a piece of work in 24 days. In how many days can the work be done by 8men and 12 women?
12. 6 men or 2 women or 4 boys can finish a work in 77 days. How many days will 1 man, 1 woman and 1 boy together take to finish the same work?
13. 4 men and 5 women can complete a work in 15 days, whereas 9 men and 6 women can do it in10 days. To complete the same work in 7 days, how many women should assist 4 men?

PRACTICE QUESTIONS:

1. A can complete a work in 40 days. B can complete the same work in 35 days. Both A and B work together for 14 days and then A goes away. The number of days that B takes to complete the remaining work is?

2. A can complete a piece of work in 18 days and B can complete the same work in 12 days. Both begin the work together but after some days, B leaves the work. If A finishes the remaining work in 3 days, then the number of days B worked is?
3. 10 men or 15 women can complete work in 30days. In how many days can 15 men and 27 women complete the work?
4. 1 man or 2 women or 3 children can complete a work in 64 days. In how many days 1 man and 2 children and 2 women can complete the work working together?
5. Raju and Satish can individually complete a work in 18 and 60 days respectively. Raju starts the work and works for 3 days. Then raju takes a break of 5 days and during this Sanju works. This process continues till the completion of work. How many days did it take to complete the work?
6. A, B and C can complete a piece of work in 24, 32 and 48 days respectively. If they work on alternate days starting with A, then B and then C so on, in how many days will the total work be completed?
