PROBABILITY-II

1. A bag contains 6 black and 8 white balls. One ball is drawn at random. What is the probability that the ball drawn is white?
2. A box contains 4 red, 5 green and 6 white balls. A ball is drawn at random from the box. What is the probability that the ball drawn is either red or green?
3. In a box, there are 8 red, 7 blue and 6 green balls. One ball is picked up randomly. What is the probability that it is neither red nor green?
4. A bag contains 6 red balls and 4 yellow balls. Four balls are picked at random what is the probability that 3 are red and one is yellow?
7. A bag contains 4 red, 5 yellow and 6 pink balls. Two balls are drawn at random. What is the probability that none of the balls is yellow in colour?
8. A bag contains 5 red, 7 yellow and 3 pink balls. Two balls are drawn at random. What is the probability of getting 1 red and 1 yellow ball?
9. A bag contains 5 red, 7 yellow and 3 pink balls. Two balls are drawn at random one after the other. What is the probability that the first ball is red and the second ball is yellow?
10. A bag contains 4 red and 6 pink balls. One ball is removed and replaced with the same colour ball and then second ball is chosen. What is the probability of getting 2 red balls?
11. In a class, there are 15 boys and 10 girls. Three students are selected at random. The probability that the selected students are 2 boys and 1 girl, is?
12. Four persons are chosen at random from a group of 3 men, 2 women and 4 children. The chance that exactly 2 of them are children, is
13. A committee of 3 members is to be selected out of 3 men and 2 women. What is the probability that the committee has at least 1 woman?
14. A box contains 20 electric bulbs, out of which 4 are defective. Two bulbs are chosen at random from this box. The probability that at least one of them is defective?
15. A number is selected at a random from the set of first 50 natural numbers. The probability that it is a prime?
16. What is the probability of having 53 Sundays in a leap year?

PRACTICE QUSETIONS:

1. One ball is picked up randomly from a bag containing 8 yellow, 7 blue and 6 black balls. What is the probability that it is neither yellow nor black?
2. Two balls are picked up randomly from a bag containing 3 red, 2 blue balls. What is the probability of getting 1 red and 1 blue ball?
3. A box contains 10 black and 10 white balls. What is the probability of drawing 2 balls of the same colour?
4. An urn contains 6 red, 4 blue, 2 green and 3 yellow marbles.
   (i) If two marbles are drawn at random from the urn, what is the probability that both are red?
   (ii) If three marbles are picked up at random, what is the probability that 2 are blue and 1 is yellow?
   (iii) If two marbles are picked up at random, what is the probability that either both are green or both are yellow?
