DATA INTERPRETATION

Directions (1-5): Read the following pie-chart to answer the questions given below it.

1. If the total amount spent during the year 1998 was rs.46000, the amount spent on food was:
2. If the total amount spent was Rs.46000, how much was spent on clothing and housing together?
3. The ratio of the total amount of money spent on housing to that of spent on education was?
4. Graph shows that the maximum amount was spent on?
5. If the total expenditure of the family for the year 1998 was Rs.46000, the family saved during the year was?

Directions (1-5): Study the bar diagram given below carefully and answer the following questions based on it.

1. The birth-rate of which country is 25% more than that of Germany?
2. The birth-rate of India is what percent of the birth-rate of England?
3. The birth-rate of China is how many times the birth-rate of Germany?
4. What is the ratio of birth-rate of India to that of Sweden?
5. By how much percent is the birth-rate of England less than the birth-rate of New-Zealand?

CODEGNAN

Directions (1-5): Study the table and answer the questions:

The table given below shows the highest and average marks of a class in four subjects in four years. The maximum marks in each subject are 100.

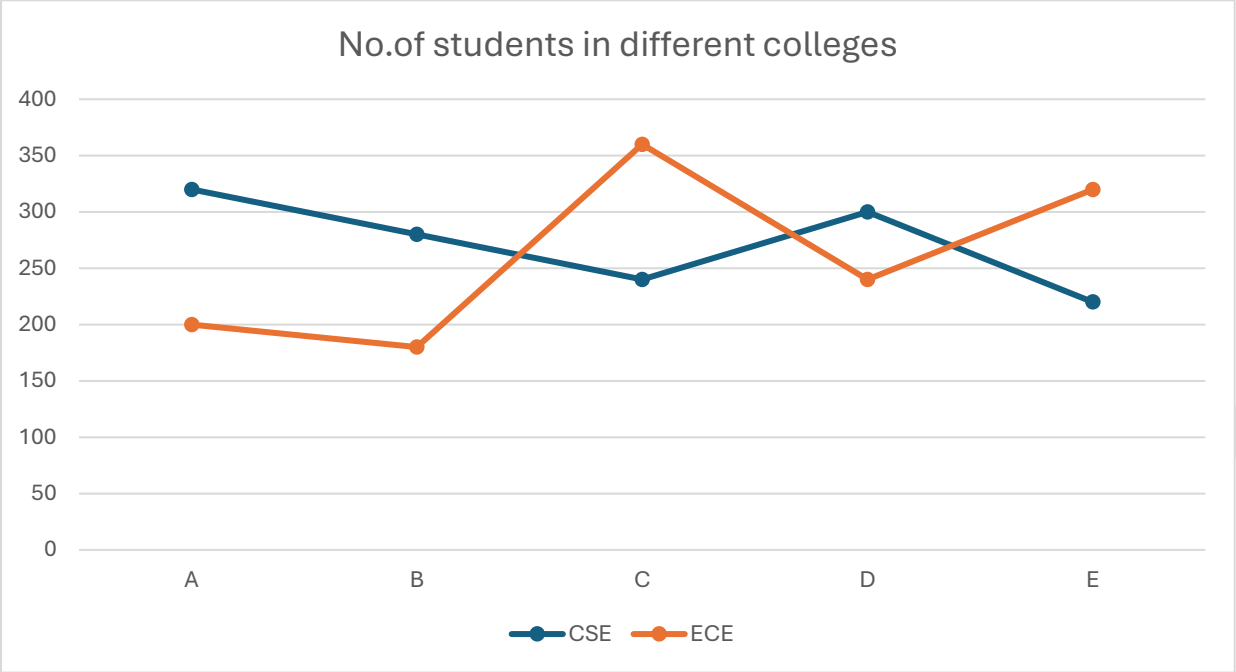

Year	SUBJECTS							
	English		Maths		Science		Social	
	Highest	Average	Highest	Average	Highest	Average	Highest	Average
1993	80	70	94	60	89	70	65	55
1994	82	65	85	62	95	64	66	58
1995	71	56	92	68	97	68	68	48
1996	72	52	91	64	92	75	77	58

1. What is the overall average of marks in the four subjects in the year 1995?
2. Supposing that there were 40 students in science in the year 1995, how much total of marks did they receive combined together?
3. In which year, the difference between the highest and the average marks in maths was maximum?
4. In which year, the difference between the highest and the average marks in social was the least?

CODEGNAN

Directions (1-5): Study the following information carefully and answer the questions given below.

The given line graph shows the number of CSE and ECE students in five different colleges.

1. The number of CSE students in C is what percent of the number of ECE students in B?
2. What is the average number of CSE students in all the colleges together?
3. What is the difference between the number of ECE students in C and D together and the number of CSE students in B and E together?
4. The number of ECE and CSE students in B is approximately what percent of the number of ECE and CSE students in D?
