1. A student has to secure 35% marks to pass in a subject. If he gets 82 marks and fails by 23 marks. What are the maximum marks of the subject?
2. A candidate scores 30% marks in a test and fails by 50 marks. Another student who gets 320 marks fails by 30 marks. Then find the pass percentage?
3. In an examination, 92% of the students passed and 480 students failed. If so, how many students appeared in the examination?
4. A number is asked to multiply by 2/3 by a student. By fault, he multiplied the number by 3/2. Find the percentage fault?
5. A boy found the answer for the question," Subtract the sum of ¼ and 1/5 from unity and express the answer in decimals" as 0.45. The percentage of error in his answer was?
6. If the numerator of a fraction is increased by 35% and the denominator is decreased by 40%. The fraction becomes ¾. Find the main fraction?
7. If the numerator of a fraction is increased by $14\frac{2}{7}$% and the denominator is decreased by $16\frac{2}{3}$%, the fraction becomes $\frac{2}{7}$. Find the main fraction?
8. The price of sugar is increased by 20%. A person wants to increase his expenditure on sugar by only 10%. Find the percentage change in the consumption?
9. The salaries of A, B and C are in the ratio 1:3:4. If the salaries are increased by 5%, 10% and 15% respectively, then the increased salaries will be in the ratio?
10. A man spends $\frac{2}{3}$ of his income. If his income increases by 14% and the expenditure increases by 20%, then the percentage increase in his savings will be?

PRACTICE QUESTIONS:

1. A student has to secure 40% marks to pass. He gets 90 marks and fails by 10 marks. Maximum marks are :
2. In an examination, a student who gets 20% of the maximum marks fails by 5 marks. Another student who scores 30% of the maximum marks gets 20 marks more than the pass marks. The necessary percentage required for passing is :
3. 72% of the students of a certain class took Biology and 44% took Mathematics. If each student took at least one subject from Biology or Mathematics and 40 took both, then the total number of students in the class is :
4. If 60% of A's income is equal to 75% of B's income, then B's income is equal to x% of A's income. The value of x is :
5. If A's income is 25% less than B's income, by how much percent is B's income more than that of A ?
